Sarra Ben Bettaieb

Data Science & AI Engineering Student

srrbettaieb@gmail.com | +216 29 702 676 | Tunisia | linkedin.com/in/sarra-ben-bettaieb-951818264 | github.com/Sarra-dev

SUMMARY

Final-year Data Science & Artificial Intelligence engineering student at Tek-Up University, seeking a 6-month final-year internship. Hands-on experience in AI, machine learning, NLP, and data analysis, particularly through LLM- and RAG-based solutions. Interested in developing practical AI solutions to automate processes and leverage data effectively.

PROFESSIONAL EXPERIENCE

Data and AI intern — Wevioo 06/2026 – 08/2026 | Tunisia

- Built an automated job-market data pipeline with data collection and PostgreSQL storage .
- Integrated a FastAPI REST API and React dashboard for job statistics and filtering.
- Implemented NLP-based skill extraction from unstructured job descriptions using spaCy.

AI & Automation Intern — MindMesh 06/2025 – 08/2025 | Tunisia

- Developed a Telegram bot that analyzes CVs in 7 formats (PDF, DOCX, TXT, and images via OCR) and automatically extracts 7 key fields (name, contact details, location, skills, job titles, and language) using NLP.
- Implemented a conversational job recommendation system delivering 5 job offers per search through the Adzuna API (France and Germany), based on job title, country, and city, with user profiles stored via a GraphQL API.

Web Application Intern — Wevioo 07/2024 – 07/2024 | Tunisia

- Developed a React web application for managing pet-related data and services.
- Contributed to frontend development and application functionality.

PROJECTS

TuniData Compass, *AI Platform for the Tunisian Job Market*

- Developed an AI-powered platform for analyzing the Tunisian job market, automating the collection of 1,500+ job postings from 3 sources, extracting 740+ skills using NLP, and classifying them into 17 domains.
- Implemented a hybrid recommendation engine (SBERT + skill overlap) with skill gap analysis, integrated into a React/FastAPI application.

AI-Powered Fitness Assistant, *Full-Stack RAG Application*

- Designed and developed a conversational fitness assistant providing personalized workout plans, nutrition advice, and exercise recommendations.
- Implemented a RAG pipeline using Google Gemini to retrieve relevant information from a local knowledge base and generate context-aware responses.
- Developed a REST API with FastAPI and a React frontend.
- Deployed the backend on Render and the frontend on Vercel.

SKILLS

Data Science & Machine Learning
Machine Learning, Deep Learning, NLP, Data Preprocessing, Systèmes de recommandation, Pandas, NumPy, Scikit-learn

Generative AI
LLMs, RAG, LangChain

Programming & Development
Python, FastAPI, Django, React, REST APIs

Cloud & Tools
AWS, Docker, Git, GitHub

EDUCATION

Engineering Cycle, *Tek-Up University, Tunisia* 2024 – Present

Preparatory Cycle, *Tek-Up University, Tunisia* 2022 – 2024

CERTIFICATES

- AWS Cloud Practitioner
- Fundamentals of Deep Learning — NVIDIA
- NCA Generative AI & Large Language Models (GenAI LLMs)
- NVIDIA AI Infrastructure and Operations

LANGUAGES

- Arabic
- English
- French

CONFERENCES

Tunisian-German Academic Congress in Business and Communication
Participated in conferences focused on digitalization and AI applications.

Tek-Up Study Trip to Turkey
Visited university campuses and technology incubators, and exchanged with technology professionals.
